Corporate Results Monitor

FNA rena's AII-Year Round Australian Corporate Results Monitor.

Currently monitoring March-July 2018.

Outside of official Reporting Seasons of February and August, FNA rena's monitoring includes H1 and FY financial reports, plus those quarterly updates that have an impact.

ANZ - ANZ BANKING GROUP	INLINE	0	0	4/4/0	30.09	29.59	8	
A messy result from ANZ Bank, given divestments and the bank's simplification program, equally beat and missed forecasts but not substantially. Low bad debts improved the underlying numbers. Brokers agree ANZ is in a superior capital position to peers and in a weak ongoing credit growth environment, capital management will underpin earnings per share. The ongoing Royal Commission is one reason keeping some brokers on Hold ratings.

Pendal Group's result came in shead of expectations, assisted by an asset sale and lower employee costs. Trends are improving in Australia and the stock trades at a notable discount to peers, but risks around funds flows are elevated and fixed costs are set to rise, keeping two brokers on Hold. Funds under management are nevertheless beating three and five year benchmarks. PPT+PERPETUAL MISS 1 0 0 0/5/1 52.20 44.70 6 Perpetual suffered significant net outflows in the March quarter amidst a weak funds performance. Curre market volatility suggests further downs de risk. The fund manager has improved diversity and global equities offer strong growth potential, although inflows to date are slow. The weak share price has kept a ber one broker on Hold, following a valuation-related upgrade from Ord Minnett. PPS-PRAEMIUM INLINE 0 0 0/1/1/0 0.69 0.69 1 Strong net inflows in the quarter led Praemium to post a 37% increase in funds under management in the year to March. The specialist platform manager is on track to meet full year revenue and earnings guidance. Morgans retains Hold. PMY-PREMIER INLINE 0 1 3/3/0 15.20 15.96 6 The reduction in Premier Investments' gross margin, reflecting intense competition in apparel, was greate than brokers' feared. However, online sales growth surprised to the upside and Smiggle posted another so performance, so well net out to in-line. Brokers expect the margin dedine to esse in the second half and for high-margin Smiggle and Peter Alexander to continue performing well. One downgrade to Hold reflects recent share price gains. REA - REA GROUP BEAT 0 0 1/2/1 75.39 81.50 4 REAG Group's March quarter result beat all forecasts on greater than expected revenue, overcoming the timing of Easter, and lower than expected costs. Earnings growth was also strong despite marketing spen on REA's new Homel Track winders speried of the properties of the spenial product, of which the company had warned. Brokers believe Homel Frack mortgage product, of which the company had warned. Brokers belie	Dec 1d Occurrence 16 co		1.6		1	11	1	
PPT - PERPETUAL MISS 1 0 0,0/5/1 52.20 44.70 6 Perpetual suffered significant net outflows in the March quarter amidst a weak funds performance. Curre market volatility suggests further downs de risk. The fund manager has improved diversity and global equities of fer strong growth potential, although inflows to date are slow. 3011 - 3111 + 31	SM1 - SYNLAIT MILK	BEAT	0	1	0/0/3	0.00	0.00	3

The result was stronger than expected and has led to a sizeable lift in consensus target (not tabled given NZD) but brokers suggest the company is currently in a "sweet spot", to use Deutsche Bank's words. Credit Suisse agrees, believing the market is not considering the risk of margin contraction through competition. There is no disagreement the stock price has run well ahead of valuation, hence all Sell ratings following Macquarie's downgrade. TNE - TECHNOLOGY ONE MISS 1 3 0/3/0 5.36 4.80 It was mostly timing issues that led the company to a miss, but weak consulting revenues offset strength in cloud. The UK business is also tardy in reaching profitability. Guidance has been downgraded (implicitly) and brokers note a heavy reliance on the traditional second half skew to achieve a flat FY. TechnologyOne is a quality business, but the stock is well priced, brokers suggest. **INLINE** TPM - TPG TELECOM 1/3/4 8 5.74 5.68 TPG Telecom's result modestly beat some broker forecasts but this was widely offset by disappointment in the group's first fall in broadband subscriber numbers and loss of market share. Brokers have lifted near term forecasts due to slower than expected NBN roll-out but this is only a timing issue. Latter year forecasts have been cut. A challenging market and stiff competition leads to a negative weighting on broker ratings. **VRL - VILLAGE** MISS 0 0 0/2/0 3.54 2.41 2 **ROADSHOW** The company's quarterly update featured a material downgrade to FY profit guidance, largely due to the recovery in theme park attendance stalling. Cinema exhibition is also facing structural headwinds from video streaming and a fourth quarter rebound is needed. Debt is becoming an issue with Macquarie suggesting risk remains to the downside. WAF - WEST AFRICAN **IN LINE** 1/0/0 0 0 0.50 0.50 1 **RESOURCES** West African Resources' result was in line with expectations. Macquarie expects a strong resource upgrade this year and success at Sanbrado increases the prospect for consolidation by other West African producers. An updated feasibility study is expected mid year which should include a high-grade underground base case at the M1S deposit. Buy retained. WBC - WESTPAC BEAT 4/3/1 33.01 31.95 8 **BANKING** Westpac posted a slight beat of consensus, driven by mortgage repricing, cost controls and productivity increases along with greater market trading income and low bad debts. Looking forward, a dark cloud in the form of the Royal Commission hangs over the bank in terms of potential regulatory response. Westpac is still trying to reduce its interest-only loan levels to meet APRA requirements. At the same time, offshore funding costs are rising, all of which points to a subdued earnings outlook. XRO - XERO BEAT 0/3/1 4 0.00 38.15 Xero's result beat most forecasts although Citi was hoping for a bit more. It was a landmark year for the company, with earnings and cash flow turning positive for the first time. A&NZ subscriber growth was reasonable while the UK is powering ahead. US growth is slow but the company is pursuing partnerships. Macquarie likes the emerging operating leverage and upgrades to Hold but while others are equally upbeat, they see too high a valuation. Citi downgrades to Hold.
